

GHC-SCW'S IMPROVED SCREENING COVERAGE

Discover a new standard of care with more frequent coverage on common screenings, effective beginning with the 2026 contract year.

At GHC-SCW, we believe in proactive health care that puts your well-being first. That’s why we’re excited to announce our enhanced coverage for common screenings, ensuring you receive the comprehensive care you deserve, more frequently!

This improved benefit covers GHC-SCW members, whether care is received at a GHC-SCW clinic or somewhere else within our broader network. We have also simplified the billing process to improve efficiency and to save your time!

Benefits of More Frequent Screenings:

- **Early Detection:** Catch potential health issues in their early stages for more effective and less invasive interventions.
- **Peace of Mind:** Regular screenings provide reassurance and allow you to take control of your health.
- **Improved Outcomes:** Stay ahead of preventable conditions and enhance your overall well-being with GHC-SCW’s proactive approach.

Our upgraded coverage includes these common screenings:

Breast Cancer Screening – Mammography	One covered annually at 100% for women aged 40 and older regardless of whether the test/screening is considered diagnostic due to a prior test result or diagnosis. Additional imaging (such as MRI, ultrasound, additional mammography) and pathology evaluation may also be covered at 100% if needed to complete the screening process.
Cervical Cancer Screening	When provided according to the population and interval guidelines for Preventive Health Services, the listed Preventive Health Services are covered at 100% regardless of whether the test/screening is considered diagnostic due to a prior test result or diagnosis.
Colorectal Cancer Screening – Optical Colonoscopy	One covered every 3 years at 100% for adults aged 45 to 75.
Osteoporosis Screening – Bone Mineral Density Exam	One covered every two years at 100% for women over 65 and postmenopausal women under 65 with certain risks, regardless of whether the test/screening is considered diagnostic due to a prior test result or diagnosis.
Diabetes Screening	One covered annually at 100% for adults aged 35 to 75 regardless of whether the test/screening is diagnostic due to a prior diagnosis of prediabetes or diabetes.

Schedule Your Screening Today!

Take the first step towards a healthier, happier you. **Call your primary care clinic or visit GHCMYChartSM to schedule your screenings.** Your well-being is our top priority!
