

Belong Health ACO REACH Care Management Program

Personalized, Ongoing Care to Keep Patients Well and Out of the Hospital

What is Belong Health ACO REACH Care Management?

Belong Health ACO REACH Care Management is a special program designed to provide **personalized, high-quality care** for patients with multiple chronic and complex health conditions. These chronic conditions are part of the focus because they are common among older adults and often require ongoing, coordinated care. Our goal is to help them **stay healthier, avoid unnecessary hospital visits, and improve their overall well-being** through coordinated support.

How We Support Patients

Belong Health ACO REACH Care Management Program consists of weekly care management outreach, for 4 weeks, and will be re-evaluated for continuation of care management after 30 days. Interventions may include:

- **Care Coordination:** Our dedicated team helps patients manage their appointments, medications, and follow-ups to keep their care on track.
- **Longitudinal Care:** We provide **ongoing, comprehensive short-term support** throughout their health journey, ensuring their care needs are met over time—not just during emergencies.
- **Health Monitoring:** We work closely with healthcare providers to detect early signs of complications and prevent emergency situations.
- **Medication & Treatment Assistance:** We help them understand their medications and treatments to stay on the best path to wellness.
- **Community Resources & Support:** We connect them with services like transportation, nutrition programs, and caregiver support.

Why This Matters

Managing multiple health conditions can be overwhelming, but patients **don't have to do it alone**. With Belong Health ACO REACH Care Management patients get:

- ✓ A care team that listens and understands patient needs
- ✓ Short-term, proactive care to keep patients well over time
- ✓ Fewer hospital visits and better management of their health
- ✓ Easy access to the support and services that matter most

Our ACO REACH patient health is our priority! We are here to work together to keep patients feeling their best—**today, tomorrow, and beyond.**
